REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:
 - The primary reason for the allowance of claim 31-34 is the inclusion of the limitations of: A U-shaped body with a strut that fits into a slot on a handle and a locking member with a tongue slidably affixed to the handle so that the tongue is away from the strut in one position and slides into a second position in which the tongue overlies the strut. These limitations were found in claims 31-34, but not the prior art. For example, Bennett et al. discloses a U-shaped body with a strut and arms with floss therebetween, but there is no slidable locking mechanism.
 - The primary reason for the allowance of claim 35 is the inclusion of the limitations of: A U-shaped body with a finger member that fits into a slot on a handle and a locking member with a tongue slidably affixed to the handle so that the tongue is away from the finger member in one position and slides into a second position in which the tongue overlies the strut. These limitations were found in claims 35, but not the prior art. For example, Bennett et al. discloses a U-shaped body with a strut and arms with floss therebetween, but there is no finger member and no slidable locking mechanism.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
